

## Arc Flash Protective Suit Kits

Protect yourself to NFPA 70E hazard risk category (HRC) 4

- Rated for 40 cal/cm<sup>2</sup> Arc Thermal Protective Value (ATPV)
- Be more comfortable with lightweight option

Constructed of Indura Ultra Soft® (88% cotton) for comfort and breathability. Jackets feature 32" (81.3 cm) length, Nomex® wrist-lets, and hook and pile storm closure. Bib overalls feature 20" (76.2 cm) inseam, integrated heavy duty suspenders, and hook and pile waist straps. Pro-Hood™ is made of Indura Ultra Soft with a 10" x 20" (25.4 x 50.8 cm) anti-fogging lens.

**Compliance:** Hood meets ASTM F2178 and NFPA 70E standards along with the flammability requirements of ASTM F1506; also CE 0120 certified. Coat and bib overalls meet ASTM 1506 and NFPA 70E standards and are CE 0120 certified.

**What's included:** arc flash coat, bib overalls, Pro-Hood, hard hat, safety glasses, and a carrying bag.

## Visitors' Glasses

### Provide safe visits economically

- Economical enough to be used as visitors' glasses; rugged enough for use on the job
- High-impact polycarbonate absorbs 99.9% of UV radiation
- Side shields for wraparound protection

**Compliance:** ANSI Z87.1-2003, CSA Z94.3

Frame color	Lens	Catalog number	Price/box
<b>Bulk packed 100 units</b>			
Clear	Clear	<a href="#">GY-48496-01</a>	
<b>Dispenser box of 20</b>			
Clear	Clear	<a href="#">GY-48496-00</a>	

**GY-40486-00 Universal dispenser box rack** easily mounts on the wall with foam tape or has holes for screws (not included)

## 3G Glasses

### Customizable for a secure fit

- Ribbed, nonslip rubber nose-piece provides for all-day comfort
- Adjustable temples with four lengths

Choose from three styles—Magnum™ glasses feature a black frame, Magnum Elite™ glasses feature a matte-finish platinum frame, and Mini-Magnum™ glasses are styled to fit individuals who require a smaller version.

**Compliance:** ANSI Z87.1+ (High impact)

Frame color	Lens	Catalog number	Price/pair
<b>Magnum™ safety glasses</b>			
Black	Clear	<a href="#">GY-86285-00</a>	
	Fog-free clear	<a href="#">GY-86285-01</a>

## Protective Eyewear

### Get better field of view, fashionably

- Telescopic, adjustable temples
- Hard-coat polycarbonate lens for 99.9% UV protection

This sporty, lightweight eyewear features an 8° base spherical wraparound lens, durable one-piece construction, and telescopic adjustable temples.

**Compliance:** ANSI Z87.1-2010

Frame color	Lens	Catalog number	Price/pair
Black	Clear	<a href="#">GY-86052-80</a>	
Silver		<a href="#">GY-86052-82</a>	

## Safety Eyewear

### You won't know they're there

- Lightweight design for more comfortable fit
- Sleek, 9.5-base lens for superior protection and unobstructed view
- Resist impacts and block 99.9% of UV rays
- Features contoured, flexible temples, and universal-fit nosebridge

Choose from two lens coatings: hard coat or antifog. The hard coat guards against scratches, static, and chemical attack.

**Compliance:** ANSI Z87.1-2003

Frame color	Lens	Catalog number	Price/pair
Clear	Clear, hard coat	<a href="#">GY-86472-70</a>	
Clear	Clear, antifog	<a href="#">GY-86472-74</a>	

## Laser Eyewear

### Minimize distortion while maximizing safety

- Lightweight, impact-resistant polymer lenses
- Protect against low-powered or indirect laser exposure
- Easily identify eyewear with inscribed wavelength, optical density, and lot number

**LOTG Series** features a broad, single-lens design to ensure maximum top and side protection.

**XC® Series** are wraparound style, to encompass the eye while cushioning each facial contact point for unparalleled comfort and impact resistance.

**LGF Series** features a polymer filter that protects against femtosecond (fs) and picosecond (ps) lasers; filters maintain optical density for 10 seconds.

**Compliance:** ANSI Z136.1-1986, Z87.1-2003 (glasses unsuitable for direct laser radiation). CE (on XC and LGF series only).

## UV-Protective Wraparound Face Shield

### Don't lose your breath

– Full-length, wrap-around shield sits away from face for easy breathing

Optically clear window of 0.06" thick polycarbonate protects against UV radiation from 200 to 360 nm. Adjustable headband.

**Compliance:** ANSI Z87.1, 29 CFR Part 1910.1030

Description	Catalog number	Price
UV-Protective wraparound face shield	<a href="#">GY-06767-00</a>	

## Face Shield

### No need for separate goggles and shield

Shield provides both primary and secondary eye protection. Attached MonoGoggle® goggles feature a soft pliable nose piece and flexible frame for a snug, comfortable fit. Lens gives you distortion-free vision. Clear polycarbonate shield protects your face. Shield features FogGuard® Plus antifog coating.

**Compliance:** ANSI Z87.1+ (High impact), CSA Z94.3, SEI certified

Description	Lens	Catalog number	Price/each
MonoShield shield	Clear, antifog	<a href="#">GY-81657-30</a>	

## Safety Eyewear Organizer

### Keep safety glasses within easy reach

Acrylic holder hangs on wall or sits on table. Isolates eyewear to prevent scratching. Compartments can be labeled for each user.

Capacity	Dimensions (W x H x D)		Catalog number	Price
	in.	cm		
12 pair	12¼ x 9¼ x 6¾	31.1 x 23.5 x 17.1	<a href="#">GY-86307-00</a>	
20 pair	15¼ x 12¼ x 6¾	38.7 x 31.1 x 17.1	<a href="#">GY-86307-05</a>	

## DP4 Face Shield

### Won't limit movement

Faceshield curves naturally to fit facial contours—ensuring reliable protection from splash, particles, and flying debris. Headgear includes ratchet suspension to adjust size and tighten at the turn of a knob.

Soft, padded browguard rests comfortably on face. Rugged, polycarbonate shield is impact- and splash-resistant. Item comes fully assembled with headgear and shield included. Replacement shields are sold separately.

**Compliance:** ANSI Z87.1+ (High impact), CSA Z94.3

Color	Material	Catalog number	Price/each

Clear	Polycarbonate	<a href="#">GY-86478-00</a>	
<b>Replacement face shield</b>			
Clear	Polycarbonate	<a href="#">GY-86478-10</a>	

## Safety Eyewear Dispenser

### Labeled for easy identification

Clear plastic dispenser holds a sleeve of visitor's spectacles or loose safety glasses. Open door flap and dispense glasses at the bottom—replenish supply easily at the top. Unit can be wall mounted or used on a tabletop. Holds approximately 20 pair.

Capacity	Dimensions (L x W x H)		Catalog number	Price
	in.	cm		
20 pair	17¼ x 8 x 4	43.8 x 20.3 x 10.2	<a href="#">GY-86456-20</a>	

## Safety Eyewear Holder

### Protect gear from dust and debris

Place eyewear holder on workbench or wall mount for easy access by workers or visitors. Holder is made of clear acrylic.

Description	Capacity	Dimensions (W x H x D)	Catalog number	Price
Holder with lid	6 pair	3¾" x 9" x 6" (9.5 x 22.9 x 15.2 cm)	<a href="#">GY-81830-10</a>	

## Emergency Personal Eyewashes

### Stop straining to keep eyes open

- Bendable eye cup keeps eyelid open during use
- Solutions meet FDA regulation, US Federal Regulations, and comply with ANSI standards for personal eyewash
- Simple to use—twist cap open, apply eye cup to eye, and squeeze
- Easy flow control—apply hand pressure as required
- Don't be without it—individual bottles can be taken wherever you go

Ideal for emergency rinsing of debris, and neutralization of acids or alkalis in the eyes. Bottles with a green eye cup are sterile saline eye wash; use to wash particulate debris from the eye. Bottles with blue eye cups contain a sterile phosphate buffer solution; use to rapidly neutralize acids, alkalis, and other chemicals in the eye.

Each bottle of DUO eyewash releases two streams to rinse both eyes at once. Wall-mountable stations come in single- or double-bottle versions; choose the covered station for dirty and dusty areas.

**Compliance:** ANSI Z358 1-2009 as personal eyewash only.

## Personal Eyewash Stations

### No need for plumbing

- Easily affix to any wall with self-adhesive backing or screws
- Don't lose control—32 oz bottles have grip strips for better handling

Emergency eyewash stations hold one or two bottles of sterile Eyesaline® solution. Single dose bottles feature extended flow nozzle. Sealed solution bottles have 3-year shelf life. Expiration date is printed on each bottle.

**Compliance:** ANSI Z358.1-2009 as personal eyewash only.

## Faucet-Mount Personal Eyewash

Be within reach of an eyewash at all times

- Easily convert a standard faucet into an eyewash station
- Flow controlled by water pressure
- Choose adjustable outlets or gooseneck mount which directs the spray across the eyes

Goosenecks let you easily adjust eyewash angle.

**Compliance:** ANSI Z358.1-2009 as personal eyewash only.

Description	Catalog number	Price

Faucet-mount eyewash; with gooseneck mounted outlets	<a href="#">GY-06767-44</a>	

## On-Site Portable Gravity-Fed Eyewash

Position where you need it—no plumbing needed

- Flushes completely—use just seven gallons of solution for full 15 minute flush
- Know when to refill—transparent polycarbonate tank for easy viewing
- Easy to use—inverted tank is activated when arm is pulled

**What's included:** transparent tank, yellow polypropylene pedestal, and stainless steel wall bracket with universal identification sign.

**Compliance:** ANSI Z358.1-2009

## 100% Sterile Primary Eyewash Station with Alarm

Minimize further injury with sterile delivery system

- Alert others of injury with auto-activation of alarm when unit is activated
- Alerts when mandatory 15-minute flush is complete
- Position and move as needed

Sterile saline cartridges have a 24-month shelf life (from date of manufacture), minimizing replacement time and expense (cartridges sold separately). Cartridge expiration date can easily be seen through side view window. Integrated waste reservoir prevents spills and eases disposal of spent solution.

**What's included:** emergency eyewash station sign and mounting bracket.

**Compliance:** ANSI Z358.1-2009

# Particulate Respirators

## Maintain safety against solid and liquid particles

- Maintain comfort with lightweight material
- Adjustable straps for a snug, comfortable fit

### N95 Respirators

N95 respirators are approved for solid and liquid particles excluding those containing oils.

**Standard N95** is the economical choice for grinding, sanding, sweeping, bagging, and other work in dusty environments.

**Cool-Flow™ N95** has an exhalation valve for easier breathing in high-heat areas.

Approval: NIOSH

Rating	Description	3M model number	Qty/ bx	Catalog number	Price/ bx
N95	Standard particulate	8210	20	<a href="#">GY-40111-02</a>	
	Cool-Flow™ valve	8511	10	<a href="#">GY-40111-04</a>	

40111-02

### R95 and P95 Respirators

**R95 Respirators** are oil-resistant; time restrictions may apply to approved use.

**P95 Respirators** are oil-proof; no time restrictions apply to approved use.

Select acid gas respirators for protection against chlorine, sulphur dioxide, hydrogen fluoride, and other acid gases. Ideal for chemical and paper processing applications.

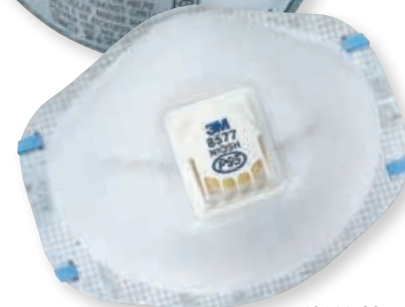

Select organic vapor respirators for protection against liquid or oil-based particles and nuisance level organic vapors. Appropriate for use in laboratory environments and petrochemical manufacturing.

Approval: NIOSH

40111-26

### N100 and P100 Respirators

**N100 Respirators** offer maximum filter efficiency—use for grinding, pharmaceutical applications, and working with metals and arsenic. Not to be used with any oil aerosols.

**P100 Respirators** are oil-proof—approved for solid and liquid particles including those containing oils; time restriction applies when oil is present. Use when grinding, welding, working with lead, or in situations where arsenic or cadmium are present up to 10X the OSHA PEL. Individually wrapped.

Approval: NIOSH

## Half-Mask and Full-Face Respirators

Wraparound lens provides over 200° field of vision

- Superior comfort and fit
- Contoured flange ensures proper seal
- Order cartridges based on your work demands

**Half-Mask Respirators** made of soft, pliable, non-allergenic silicone offering excellent comfort and fit. Low-profile design gives a wide field of vision and room for protective eyewear. Contoured, extended side sealing flanges and design of nose area provide a good seal for easy communication or other facial motions.

Removable cradle-suspension straps offer a balanced, comfortable and secure fit.

**Approval:** NIOSH

**Full-Face Respirators** feature hard-coated, scratch- and impact-resistant wraparound polycarbonate lens providing over 200° field of vision. Lens protects eyes and face against irritating gases, vapors, and flying particles. The oral/nasal cup with dual sealing flange reduces fogging. Silicone face piece features a speaking diaphragm for clear communication.

**Compliance:** ANSI Z87.1-1989

**Approval:** NIOSH

Full-face respirator 81606-20

Description	Catalog number	Price

			P100	2	<a href="#">GY-81606-62</a>	

†OSHA regulations require that gas-proof goggles be worn with half-mask respirators when using formaldehyde.

## Half- and Full-Facepiece Respirators

Lightweight and comfortable—ideal for extended wear

- Drop down head harness to keep half mask close when not in use
- Exhalation valve directs air downward to prevent fogging of full facepiece
- Adjustable headstraps for secure fit

Half-facepiece respirator 40113-00 with cartridges 40113-70

Order respirator facepieces, cartridges, and filters separately below according to the demands of your work environment.

**Approval:** NIOSH

### Half-Facemask Respirators

are low-maintenance and cost about half as much as a typical reusable respirator. All you need to replace are the cartridges. Respirators feature a comfortable thermoplastic material in a low-profile, balanced design.

**Full-Facepiece Respirators** are made of a soft, lightweight material in three sizes with easy-to-adjust headstraps for maximum comfort. The large hard-coated lens provides a wide field of vision enhancing worker acceptance.

Size	Half-Facemask		Full-Facepiece

†OSHA requires that gas-proof goggles be worn with half-facemask respirators when used against formaldehyde.

## Three-Panel Particulate Respirator

### Protect breathing and maintain vision

- Prevents collapsing and fits many face sizes
- Individually wrapped to prevent contamination during storage
- Low profile design—ideal for use with other safety equipment

86401-00

Adjustable nose clip provides a custom fit and a long-lasting, secure seal. Model 86401-10 features a one-way exhalation valve that reduces build-up of moisture and allows comfortable breathing.

86401-10

Use in dusty environments or in those with liquid or non-oil based sprays that do not contain harmful vapors.

**Approval:** NIOSH

N95	Particulate respirator with exhalation valve	10	<a href="#">GY-86401-10</a>	

## Dust Mask Dispenser

### Stay organized and prevent waste

Convenient, clear acrylic dispenser has a unique cutout design that allows you to reach into the opening to easily remove even the last mask. Dispenser holds more than 30 masks and can be stored conveniently on your benchtop or mounted to the wall to save space. Measures 12½"H x 6"W x 6"D (31.8 x 15.2 x 15.2 cm).

Description	Catalog number	Price
Dust mask dispenser	<a href="#">GY-86456-00</a>	

## Respirator Storage Bag

- Keep respirators contamination free

10-mil thick reusable transparent bag with zipper. Includes cleaning instructions.

[GY-86400-00](#) Respirator storage bag

## Belt-Mounted Powered Air Purifying Respirator (PAPR) System

### Protect against asbestos and other fine dust hazards

- Up to eight hours operation on a single charge
- Made from lightweight Tychem® for excellent particulate and liquid protection

This positive-pressure hooded respirator is ideal for workers with facial hair who can not wear a tight-fitting mask. When assembled, components comprise a NIOSH-approved respirator; order components separately.

### REQUIRED System Components For NIOSH Compliance

- 1) Hood
- 2) Breathing tube
- 3) Blower assembly
- 4) Battery charger

The standard hood features a chin shroud with elastic band to maintain a tight fit. The extended bib hood can be tucked to maintain a tight fit into workers coveralls allowing a flow of air to help cool the user.

Breathing tube brings air from blower assembly into the hood. Blower assembly includes blower, HEPA filter with 99.97% efficiency to 0.3 micron (replacement filters available), battery pack (charger sold separately), waist belt, and airflow indicator.

**Compliance:** NIOSH

## Spill Control Products

### No more multi-step cleanups

- One step chemical spill treatment
- Easy identification of agent with unique color

**Spill-X-A® Acid Neutralizer** neutralizes and solidifies most organic and inorganic acids, including hydrofluoric acid.

**Spill-X-C® Caustic Neutralizer** neutralizes and solidifies many common caustics and organic bases, including sodium hydroxide and hydrazine.

**Spill-X-S® Solvent Adsorbent** reduces vapors released during cleanup and elevates flash point of flammable organic spills. Treats spills of many common solvents, reagents, and fuels. Does not treat organic peroxides or hydrazine compounds.

**Spill-X-FP® Formaldehyde Polymerizer** is formulated to rapidly treat formaldehyde spills and reduce their vapors to limit contamination. Reacts with aqueous formaldehyde to form a polyoxoilyn polymer.

**Note:** Where formaldehyde solution strength is less than 15%, apply Spill-X-S solvent adsorbent to solidify remaining liquid.

### Spill Treatment Kits

Spill cleanup kits feature one spill treatment guide with instructions for start-to-finish cleanup, six easy-to-handle polypropylene containers for pouring or shaker-type application of agent, convenient green plastic case for compact storage, one pair of rubber gloves and safety goggles, 100 pH test papers with color guide, scraper, two pickup pans, and six disposal bags.

### Spill Kit Agent Refills

Refill agents are available in packages of six easy-to-store polypropylene containers. Order to replace specific or multipurpose spill treatment kit containers.

86292-08

### Bulk Agent Refills

Economy-size pails of control agent cover the following size spills:

- Spill-X-A acid neutralizer for 5-gal. (19-L) spill
- Spill-X-C caustic neutralizer for 3-gal. (11-L) spill
- Spill-X-S solvent adsorbent for 3-gal. (11-L) spill
- Spill-X-FP formaldehyde polymerizer agent (coverage is based on formaldehyde strength)

86293-50

Guide and instructions are included with each six-pack or pail for start-to-finish cleanup.

## Steel Flammable Storage Cabinets

### Accommodate your needs—adjustable steel shelves hold up to 159 kg

Flammable cabinets are constructed of epoxy-powder coated, double-walled, 18-gauge steel with 1½" (3.8 cm) insulating air barrier—ideal for safely storing flammable liquid containers up to 5 gallons in size. Cabinets feature dual vents, grounding attachments, and key lock. Available with either manual-latching or self-closing (fusible link actuated at 160°F/71°C) doors. Include adjustable HDPE shelf trays for excellent spill containment. Hazard label: FLAMMABLE—KEEP FIRE AWAY.

**Approval:** FM (self-closing models only)

**Compliance:** OSHA/NFPA Code 30 specifications, UFC 79 (self-closing models only)

## Steel Flammable Storage Cabinets

### Never leave the door open again

Cabinets feature 18-gauge steel, all-welded, double-wall, insulating air barrier construction for protection and durability. The reinforced SpillSlope™ shelves are adjustable in 2¼" (5.7 cm) increments and feature built-in troughs and leakproof wells to contain spills. Self-closing models feature self-latching doors with U-loc™ padlockable handle and 3-point locking system to ensure complete closure.

Models with self-closing doors feature Haz-Alert reflective labeling and a fusible link that melts at 165°F (73.8°C); automatically closing cabinet doors to prevent exposure to fire. Adjustable leveling feet help to maintain proper alignment on uneven surfaces.

**Approval:** FM

**Compliance:** OSHA, NFPA, UFC 79 (self-closing models only)

## Wooden Flammable Storage Cabinets

### Won't let out spills

Use this lockable, wooden cabinet to conveniently store flammable liquids. Constructed of 1" (2.5 cm)-thick high-density plywood; finished with yellow epoxy paint inside and out. Specially designed floor serves as a liquid-tight trough to retain spills. Locking door features continuous piano-type hinges and a 10" x 10" (25.4 x 25.4 cm) "Flammable" hazard label. Contain one variable position shelf. Meet all applicable OSHA and NFPA standards for flammable safety cabinets. Models 81780-25 and -27 are supplied with self-closing doors that meet the Uniform Fire Code (UFC).

**Compliance:** OSHA, NFPA, UFC (self-closing models only)

## Compact Steel Cabinets

Keep chemicals close at hand—ideal for benchtop use

Use these 18-gauge steel cabinets to safely store flammable or combustible liquids. Cabinets come equipped with either a manual or self-closing door (fusible link melts at 165°F/73.9°C) for added safety and one adjustable shelf for convenience. Doors have a three point fail-safe locking mechanism and feature a “Flammable” hazard label. Place cabinets under an existing countertop or use as stand alone units.

**Approval:** FM (models 81790-22 and -23 only)

**Compliance:** OSHA/NFPA, UFC 79 (self-closing models only)

## PE Acid and Corrosive Cabinets

Maintain safe storage of aggressive chemicals

Adjustable shelves contain small spills and remove for easy cleaning. Doors feature integral handles with key lock holes (lock not included) and recessed areas for additional storage of smaller bottles. Cabinets have a one-gallon top and internal sump capacity, two 2" (5.1 cm) vents with cap, leveling feet, and “Caution Corrosives” label.

Description	Capacity	No. of shelves	Dimensions (W x H x D)	Shpg wt		Blue		White

## HDPE Acid Storage Cabinets

Don't sacrifice workspace—recessed top for additional work surface

These HDPE acid storage cabinets won't corrode or rust when exposed to acids. One-piece, molded body construction prevents leaks. Includes removable bottom tray funnel and sump. Recessed area in door stores small containers.

Style	Capacity	No. of shelves	Dimensions (W x H x D)	Shpg wt lb (kg)	Catalog number	Price

## Polypropylene Acid Storage Cabinets

No more leaks

These polypropylene acid storage cabinets contain no metal parts—they won't corrode or rust. Constructed of ¾" (0.96 cm)-thick white polypropylene, cabinets feature plastic hinges and welded interior seams to prevent leakage. Choose from benchtop or full-size models. All cabinets are lockable and include hazard warning label, padlock, and two keys.

**Compliance:** OSHA

## Wood and HDPE Acid Storage Cabinets

### Won't corrode—metal-free design

**Wood Cabinets** are made of 1" (2.5 cm)-thick plywood, wood hinges, and feature a liquid-tight floor trough and chemical-resistant epoxy paint. Models 81780-02 and -04 include a liquid-tight top dispensing area. **HDPE Cabinets** are made of ¾" (1.9 cm)-thick high-density polyethylene, plastic hinges, and feature liquid-tight welded interior seams. Model 81780-20 includes a liquid-tight top dispensing area. **Compliance:** OSHA

#### Accessories

[GY-81780-52](#) Nitric acid compartment fits on top or bottom shelf of full-size acid storage cabinets. Holds five 2.5-L containers. Constructed of ⅛"-thick polypropylene

## Steel Acid Cabinets

### Stands up to chemicals—epoxy-coated steel for protection

Acid cabinets are constructed of epoxy-powder coated, double-walled, 18-gauge steel with 1½" (3.8 cm) insulating air barrier—ideal for both flammable and nonflammable acids and corrosive liquids. Cabinets feature dual vents, grounding attachments, and key lock. Available with either manual-latching or self-closing (fusible link actuated at 160°F/71°C) doors. Includes adjustable HDPE shelf trays for excellent spill containment. Cabinets are blue with hazard label: CAUTION-CORROSIVES. **Approval:** FM (self-closing models only).

**Compliance:** OSHA/NFPA Code 30 specifications

Capacity (gal.)	No. of shelves	Dimensions (W x H x D)	Shpg wt lb (kg)	Manual-latching door		Self-closing door

## Vented Chemical Storage Cabinets

### Don't get overcome by vapors

Vented, ductless cabinets are equipped with a silent turbine fan that draws chemical vapors from bottles into a molecular filter with high absorption capacity—maintaining the purity and quality of the air outside. Polyester-coated steel cabinets include glass doors for immediate view of stored chemicals. Internal adjustable shelves feature magnetic signs for separating and labeling the chemical types stored. Single and double models feature a spill tray at the base and a door lock with keys. Models with a sensor monitor filter performance and use visual and audible alarms to alert you of needed filter maintenance or fan failure. Get better protection by stacking multiple filter cartridges. **Compliance:** AFNOR NF X 15-211, Class II

## Deep Slimline Steel Safety Cabinets

### Make the most of limited space

- Extra depth for maximum fire-resistant storage capacity
- Ideal for extra storage alongside existing 60- or 90-gallon cabinets or where space is limited
- 18-gauge welded steel, double-wall construction with 1½" (3.8 cm) insulating space

All cabinets feature self-latching doors with U-loc™ padlockable handle for complete closure, a three-point fail-safe locking mechanism, and Haz-alert reflective label. Choose models with manual-closing doors, or OSHA- and NFPA-compliant models with self-closing doors.

Approval: FM

Compliance: OSHA, NFPA Code 30, UFC (self-closing models only)

## Safety Waste Systems

### Dispose of hazardous chemicals quickly and easily

- Includes a waste bottle and screw-on funnel
- Hinged lid on the funnel protects against dangerous vapors
- Long funnel stem minimizes evaporation

Model 81400-12 is made of break- and chemical-resistant HDPE—not recommended for use with flammable or combustible liquids. Model 81400-14 is made of fluorinated HDPE for even greater chemical resistance.

Material	Capacity	Funnel dimensions (mouth ID x stem L)	Catalog number	Price
HDPE	1.1 gal. (4 L)	14 x 25.4 cm	<a href="#">GY-81400-12</a>	
Fluorinated HDPE	2.6 gal. (10 L)	25.4 x 25.4 cm	<a href="#">GY-81400-14</a>	

## Disposal Cans

### Pour with minimal splash

- Wide 4" (10.2 cm) opening

Lock the venting spout cap in the open position. The free-swinging handle maintains can balance. Order the steel cans for flammable liquids and the HDPE cans for corrosive chemicals.

## Safety Cans for Flammables

### Safely contain hazardous liquids and control vapors

- A necessary part of compliance for safety in the workplace
- Reduce the risk of fire, protecting both personnel and facilities
- Get smooth, accurate pouring and filling

81791-42

81791-45

All cans include a stainless steel flame arrester that prevents flashback ignition to reduce fire risks; also include a large ID zone for user labeling of contents to avoid misuse. Self-closing caps are designed with a relief mechanism to vent pressure—protects against rupture and explosion.

**Type I Safety Cans** feature a single spout for filling and dispensing. Optional “stay-on” polypropylene (PP) funnel fits Type I steel cans and aids in pouring into smaller openings.

**Type II Safety Cans** are perfect for repetitive use to reduce worker strain. The “one-spout” design offers a highly controlled liquid flow method for accurate, plug-free pouring. Flexible 9" (22.9 cm) long metal hose ensures easy positioning for smaller openings.

Approval: FM, UL, cUL
